

CHEMISTRY DEPARTMENT COLLOQUIUM
Fall 2008

BROOKLYN COLLEGE of the City University of New York
2900 Bedford Ave., Brooklyn, NY 11210-2889

Unless otherwise stated, seminars are on Fridays, from 2:30 to 3:30 PM in 432 New Ingersoll Hall.

Sep 12	Dr. Kenneth Foreman OSI Pharmaceuticals, Inc.	The Evolution of Selective IGF1R Inhibitors
Oct 3	Tadanori Koga Materials Science and Engineering SUNY Stony Brook	Green Polymer Thin Film Processing Using Supercritical Carbon Dioxide
Oct 10	Prof. Gary Molander Dept. of Chemistry University of Pennsylvania	Organotrifluoroborates - Transforming the Suzuki Coupling Reaction
Oct 17	Prof. Iban Ubarretxena-Belandia Department of Structural and Chemical Biology Mount Sinai School of Medicine	Structural and Biochemical Studies of Intramembrane Proteolysis
Oct 23 <i>(This is a Thurs; seminar will be held at 12:30 PM in 148NE.)</i>	Prof. Daniel G. Nocera Henry Dreyfus Professor of Energy Massachusetts Institute of Technology	<u>Friedman Lecture:</u> Powering the Planet with Artificial Photosynthesis
Nov 7	Prof. Brian Williams Department of Chemistry Bucknell University	Solvatochromism in Aromatics: Something Old, Something Borrowed, Something New
Nov 14	Dr. Yolanda A. Small Center of Functional Nanomaterials Brookhaven National Laboratory	TBA
Dec 5	Prof. John Magyar Department of Chemistry Barnard College	Metals, Microbes, and Biogeochemical Cycles
